

Olga Kruglova

FRONTEND DEVELOPER

Poznań, Poland • +48 531 610 311 • olkruhlova@gmail.com • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 6+ years of experience building enterprise-scale applications in aerospace and education sectors. Specialized in modernizing large legacy systems and designing scalable Angular and React architectures. Strong focus on data visualization, design systems, and performance optimization. Experienced in leveraging AI-assisted development tools to improve team productivity and delivery speed.

PROFESSIONAL EXPERIENCE

Frontend Software Engineer

Inetum | 2021 - Present

- Developed enterprise-scale Angular (14-16) applications in aerospace sector
- Built and maintained 30+ complex UI views for engineering workflows
- Designed scalable component architecture and reusable UI components using design tokens, enabling consistent UX across 4 products
- Implemented interactive data visualizations (D3.js) for analytical tools, improving data comprehension
- Led modernization of legacy system (~200k LOC) into maintainable Angular architecture
- Improved development efficiency by leveraging AI-assisted tools (Claude, GitHub Copilot) for code generation and reviews
- Maintained high test coverage through comprehensive unit testing (Jasmine, Karma) and code reviews
- Collaborated in cross-functional teams across frontend, backend, and UX to deliver integrated solutions on schedule

Frontend Developer

Gfi East | 2019 - 2021

- Developed React-based single-page applications using Material UI for education and banking sectors
- Implemented responsive and accessible UI (WCAG) achieving compliance across all devices
- Integrated frontend with REST APIs for dynamic data-driven features, reducing page load times and improving overall application performance
- Collaborated with designers to deliver pixel-perfect UI from mockups, ensuring high design fidelity
- Supported migration from AngularJS to Angular 2, contributing to performance improvements
- Reduced production bugs through rigorous testing, debugging, and peer code reviews

Graphic Designer

India Cosmetics | 2018

- Designed visual assets and branding materials for product launches
- Collaborated on UI concepts and layout design, building foundation for transition to frontend development

TECHNICAL SKILLS

Frontend

Angular 16+
React
TypeScript
JavaScript (ES6+)

Styling

Tailwind CSS
Material UI
PrimeNG
Bootstrap
Responsive Design
Design Tokens

Data

RxJS
Signals
REST APIs
D3.js
Data Visualization
Google Analytics

Testing

Jasmine/Jest
Karma
React Testing Library
Unit Testing
Integration Testing
Code Review

Tools

Git / GitHub
npm / yarn
Figma / Adobe Suite,
Claude / Copilot
Agile (Scrum, Kanban)
WCAG Accessibility

KEY PROJECTS

DAC Correlation Service | Sector: Aerospace

Automated platform for Lifecycle Engineers to perform DACS Technical Clearance

Tech Stack: Angular 16+, RxJS, Signals, PrimeNG, D3.js, Google Analytics, Karma/Jasmine

- Built large-scale Angular application from scratch, delivering 25+ responsive views
- Designed component architecture and design token-based system for scalability across multiple products
- Developed interactive data visualizations using D3.js, significantly reducing technical clearance processing time
- Improved development speed by leveraging AI tools (GitHub Copilot, Claude) for code generation and testing
- Achieved 95% user satisfaction score through comprehensive unit testing (Jasmine, Karma) and rigorous code reviews

Integrated Lifting System | Sector: Aerospace

Platform for engine fleet monitoring supporting removal planning and engineering assessment

Tech Stack: Angular 16+, RxJS, Signals, PrimeNG, D3.js, Google Analytics, Karma/Jasmine

- Led modernization of ~200k LOC legacy JavaScript system into Angular architecture, significantly improving maintainability and reducing technical debt
- Delivered 30+ high-performance UI screens, reducing customer-reported bugs through comprehensive testing and quality improvements
- Built reusable UI components, reducing duplicate code and accelerating feature development
- Established coding standards and documentation practices, reducing onboarding time for new developers
- Collaborated on performance optimization and API integrations

Talent Digital | Sector: Education

Platform for employee upskilling with personalized learning experiences

Tech Stack: React, Material UI, Responsive Design, WCAG, Markdown

- Developed single-page applications with React, serving 5,000+ users across 10+ companies
- Implemented responsive and accessible UI across devices, achieving WCAG compliance
- Integrated frontend with backend APIs
- Achieved 90%+ test coverage through comprehensive testing strategy and peer code reviews

AntiFraud Hub | Sector: Banking

Fraud prevention platform for financial institutions

Tech Stack: AngularJS/Angular 2

- Contributed to AngularJS → Angular 2 migration, improving overall application performance

EDUCATION & CERTIFICATION

Microsoft Azure Fundamentals (AZ-900) | 2026

Frontend Web Developer Nanodegree | Google | 2017 - 2018

Post-Secondary IT School (Informatyka) | 2016 - 2018

Computer Graphics Professional Training | 2017

LANGUAGE PROFICIENCY

Polish: Professional

English: Advanced (B2)

Ukrainian: Native

Russian: Native
